RE: Maintenance in T-Hangars

The purpose of this memorandum is to reiterate that any for-hire maintenance work performed on aircraft inside the T-Hangar must be done by a mechanic that is authorized by the Airport and issued a permit as outlined in the Muskegon County Airport's Minimum Standards for Commercial Aviation Operators, dated January 11, 2011. This requirement ensures that the mechanic is properly licensed and insured. Please feel free to contact me at 231-798-4596 x4903 with any questions.

Sincerely,

Marty Piette, A.A.E.
Airport Manager
